

Unleash the Power of Uncapped, Unshaped Connectivity.

By entrusting us with your complete communications portfolio, we guarantee a reduction in your overall telecommunications expenditure, allowing you to focus on what matters most – growing your organisation.

Experience the true potential of the internet with uncapped, unshaped connectivity that offers symmetrical speeds of up to 1 000Mbps.

Broadband:

We provide symmetrical bandwidth, ensuring reliable internet access with uncapped and unshaped connectivity. Easily scale your bandwidth on demand to support additional organisation applications.

Voice:

This next-generation IP telephony solution offers seamless migration from conventional voice systems to SIP, with Geographic Number Portability across South Africa.

Organisation Wi-Fi:

A comprehensive solution for your organisation, that covers every aspect, from setup to ongoing support and proactive monitoring.

Integrated Security and IoT:

Effective connectivity enhances remote monitoring by ensuring real-time data transmission and seamless communication between devices.

Microsoft 365:

Enhance collaboration, security, compliance, intelligence and mobility, empowering your team to work together efficiently and securely.

Satellite:

A cost-effective and scalable solution, primed to fill the connectivity gap – providing coverage in areas where terrestrial services won't reach, with lower latency and higher bandwidth.

Guest Wi-Fi:

A seamless and secure internet connection for your visitors/guests, transforming their experience while providing you with valuable insights.

Push to Talk (PTT):

Enhance communication and productivity within your organisation by enabling instant, real-time voice communication and instant messaging among team members. Users can now engage in one-on-one conversations, one-to-many communications or within Broadcast Groups.

Why Choose Us

We understand that seamless connectivity is not just a luxury, for a modern organisation – it's a necessity.

Partner with us today and experience:

- Symmetrical Speeds for Seamless Experience
- Robust, Reliable Fibre Infrastructure
- End-to-End Solution
- Best-Effort Service with High Availability
- Personalised Customer Support
- Secure Communication

“Join the continent’s largest independently owned network, linking Africa to the rest of the world.”
